## Your Results

**Report For:** www.internetsoluzioni.com

**Date:** Thu 14 Jun

**Time:** 2:00 - 10:00 USA Eastern Time

**Server Type:** Apache/1.3.3

**Overall Rating:** Good

Performance Summary			
Event	Your Server's Average	NetMechanic Average	Percentile
Host Ping	46.32 millisc	449.99 millisc	59 th
DNS Look Up	0.00 sec	0.07 sec	54 th
Connect Time	0.14 sec	1.41 sec	44 th
Download Time (10k file)	0.29 sec	1.05 sec	53 th
Timeouts	0	-	

- Host Ping: Indicates the network speed between your server and ours.
- DNS Look Up: Indicates the time required to look up your server's address in the DNS database.
- Connect Time: The time required to open a network connection to your server.
- Download Time (10k file): The time which would be required to download a 10k file from your server.
- Number of Timeouts: The number of times your server failed to respond within 30 seconds.

Warning areas are highlighted in dark yellow; problem areas are highlighted in red.

### Download Time (10k file)

The chart above shows the time required for your server to transfer a 10k size file. [Click here](#) to see an explanation of these results or read our [FAQ](#) for details.

Remember that server performance varies by time of day and day of the week. The grade you received may change in future tests.
